# Kansai Economic Insight Monthly 2018/8/30

## Vol.64 July/August

- ▼APIR "Kansai Economic Insight Monthly" is an analysis of the economic trends in the Kansai region and of the Kansai-related sectors of China's economy.
- ▼The report is scheduled to be published in the fourth week of each month.
- ▼ Authors: Yoshihisa Inada (Konan University Professor and Director of the APIR Center for Quantitative Economic Analysis), Yusuke Kinoshita (APIR Program officer), Yusuke Ikuta, Nguyet Thi Khanh Cao, Teng Ma (APIR Researchers) and Norihiko Toyohara (Kwansei Gakuin University Professor).
- ▼The term "Kansai" in this report is identical to the term "Kinki" used by ministries and agencies publishing statistical data. It includes the following prefectures: Shiga, Kyoto, Osaka, Hyogo, Nara, and Wakayama.

#### Index

#### Highlights

Trends in the Kansai Economy Kansai Economic Trend Indices Major Monthly Statistics

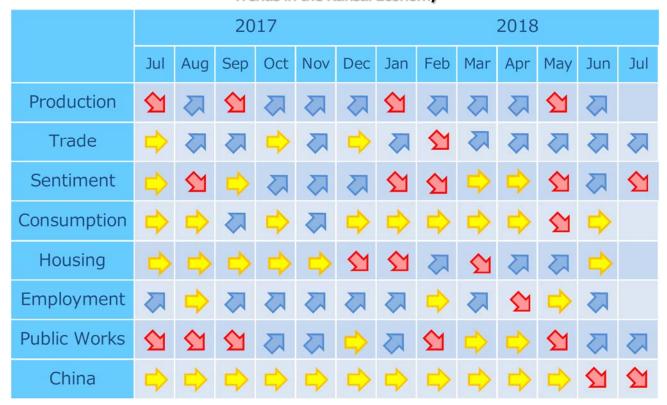

#### **Highlights**

#### - Current economic deterioration, a standstill in sight -

- Although the Index of Industrial Production (IIP) in June registered a MoM increase for the first time in two months, the assessment by the Kansai Bureau of Economy, Trade and Industry remained unchanged. Overall, production in April-June expanded, returning to positive growth for the first time in two quarters.
- ✓ The trade balance of the Kansai region in July remained positive for the six consecutive month in contrast to Japan as a whole, which logged a trade deficit for the first time in two months. Nevertheless, Kansai's trade surplus shrank YoY.
- ✓ The Economy Watchers Diffusion Index (DI) released by the Cabinet Office in July posted a MoM deterioration for the first time in two months. The natural disasters in the previous month extended their adverse impacts on department store sales and the recreation sector. Despite robust sales of summer goods due to the heat wave, for the most part the consumer sentiment remained lackluster.
- Total cash earnings in the core prefectures (Hyogo, Kyoto and Osaka) saw the 13th consecutive month of YoY growth in May. Real wages increased for the third consecutive month too, suggesting that overall incomes are steadily on the upturn.
- ✓ In June, sales by large retailers expanded YoY for the first time in two months. In spite of anemic growth in summer goods sales at supermarkets due to the unfavorable weather conditions, department store sales were in top shape, propped up by bargain-driven upfront spending and tax-free goods.
- ✓ The number of new housing starts in June declined MoM for the first time in three months as condominium construction plummeted sharply. Nevertheless, overall April-June new residential construction saw a YoY expansion, growing for the first time in five quarters.
- ✓ The effective jobs-to-applicants ratio in June improved for the first time in three months. The labor market is tight, and although the unemployment rate increased for the first time in four months, the overall employment environment remains in a good shape.
- The value of public works contracts in July saw a second month of substantial positive growth. Due to the reconstruction demand after the earthquake, the positive growth is expected to continue.
- Construction work in June increased YoY for the fourth consecutive month. As a result, April-June construction registered a YoY expansion for the first time in four quarters.
- ✓ The number of international tourist arrivals at Kansai International Airport in July rose YoY for the 17th consecutive month. Although the earthquake in Northern Osaka did have a negative impact, growth rate has remained positive.
- ✓ In China's manufacturing sector, the Purchasing Managers' Index (PMI) deteriorated for the second consecutive month in July. Although January-July cumulative fixed capital investment decelerated for the fifth month in a row too, investments in high-tech manufacturing and in industries related to environmental protection and regulation expanded substantially.

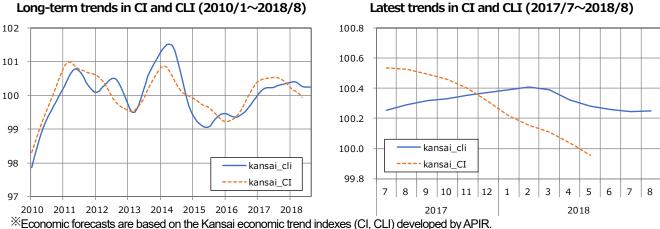

#### Trends in the Kansai Economy

#### (\*Criteria for determining the trends)

- **Production**: The trend is positive if there is at least a 0.5% month-over-month increase in the seasonally adjusted production index released by the Kansai Bureau of Economy, Trade and Industry. If there is a decrease of 0.5% or more, the trend is negative. Otherwise, the trend is stable.
- Trade: The trend is positive if there is an improvement in the trade balance of 50 billion yen or more compared to the same month of the previous year according to the Osaka Customs trade statistics. If there is a deterioration of more than 50 billion yen, the trend is negative. Otherwise, the trend is stable.
- Sentiment: The trend is positive if the Diffusion Index (DI) for the Kinki region published in the Cabinet Office 'Economy Watchers Survey' improves by at least 1 point from the previous month. If it deteriorates by 1 point or more, the trend is negative. Otherwise, the trend is stable.
- Consumption: The trend is upward if the monthly large retail store sales index (all stores) compiled by the Kansai Bureau of Economy, Trade and Industry increases by 1% or more year-over-year. If it decreases by more than 1%, the trend is downward. Otherwise, the trend is stable.
- Housing: The trend is upward if new housing starts increase by 5% or more year-over-year according to the housing construction statistics published by the Ministry of Land, Infrastructure and Transport. If there is a decrease of 5% or more, the trend is downward. Otherwise, the trend is stable.
- **Employment**: The trend is positive if there is an improvement of at least 0.01 point in the seasonally adjusted effective job offerings-to-applicants ratio published by the Ministry of Health, Labor and Welfare. If there is a deterioration of 0.01 points or more the trend is negative. Otherwise, the trend is stable.
- Public Works: The trend is positive if the monetary value of public works contracts increases by at least 5% year-over-year as per the statistics on advance
  payment guarantees released by West Japan Construction Assurance Ltd. If it decreases by 5% or more, the trend is negative. Otherwise, the trend is stable.
