

Japanese Economy: Analysis and Forecasts No.136

20 December, 2021

A Macroeconomic Analysis Project

- ▶ This report is a summary of the economic analyses and forecasts put together by APIR's macroeconomic analysis project team.
- ▶ The project team consists of young professionals from member companies and APIR researchers, and is headed by Yoshihisa Inada, Director of the APIR Center for Quantitative Economic Analysis and Professor Emeritus of Konan University.
- ▶ This report and the forecasts in it were co-authored by Yoshihisa Inada and Mitsu Shimoda from the Japan Applied Research Institute.
- ▶ This project is part of a 40-year research collaboration between young business professionals and academics, and its forecasts are widely used.
- ▶ The project was originally established by Chikashi Moriguchi and Kanemi Ban, Professors Emeritus of Osaka University. Since 2005 it has evolved into an endeavor to incorporate Current Quarter Model forecasts into the existing quarterly macroeconomic forecast model.
- ▶ Aiming to provide a timely response to changes in the economy, the report has been published quarterly since 2004.

Forecast Highlights

Economic forecast updated due to revisions in 2021 Q3 second advance GDP estimate

- Real GDP projected to expand +2.7% in FY 2021,
+2.6% in FY 2022 and +1.7% in FY 2023 -

- ◆ In the second advance GDP estimate released on December 8, Japan's Q2 real GDP was revised down to an annualized -3.6% QoQ. The figure was -0.6%pt lower than the first advance estimate. In the revision, the series up to 2021 Q1, which were originally preliminary quarterly data, were replaced with annual revision estimates. Additionally, the dummy variable used for seasonal adjustments was changed to reflect the impact of COVID-19. This resulted in a relatively large revision of the past quarterly pattern.
- ◆ Since the second advance Q2 GDP estimate revised the historical GDP level, the pre-pandemic peak, which was previously 2019 Q3, was revised downwards to JPY 556.6 trillion. At the same time, the 2019 Q2 figure was revised upwards to JPY 557.3 trillion, meaning that the historical peak changed from 2019 Q3 to 2019 Q2. Setting the 2019 Q2 GDP level at 100, the 2020 Q2 figure was 89.9 (JPY 501.1 trillion), down -10.1% (JPY -56.1 trillion) due to COVID-19. The 2021 Q3 figure was 95.6 (JPY 532.8 trillion), remaining -4.4% (JPY -24.5 trillion) below the peak. It clearly reveals the slow recovery of the Japanese economy.
- ◆ Reflecting the second advance Q3 GDP estimate, we have updated our forecasts for FY 2021-23. Our latest real GDP growth forecast is +2.7% in FY 2021, +2.6% in FY 2022 and +1.7% in FY 2023. Compared to our previous forecast (No. 135), the FY 2021 figure is -0.1%pt lower, the FY 2022 figure is unchanged, and the FY 2023 figure is +0.3%pt higher, reflecting the delayed recovery.
- ◆ The contributions to real GDP growth by major components in FY 2021 are estimated at +1.7%pt by private demand, +0.9%pt by net exports and +0.4%pt by public demand. Compared to our previous forecast (No. 135), the contribution of public demand was revised downwards, whereas those of private demand and net exports were revised upwards. The contributions are expected to remain essentially the same in FY 2022. The FY 2023 contributions are estimated at +1.0%pt by private demand, +0.4%pt by net exports and +0.3%pt by public demand.
- ◆ On a quarterly basis, private final consumption expenditure is expected to expand rapidly in Q4, due to the accumulation of savings caused by the pandemic and the easing of restrictions (a trend called "revenge consumption"). As a result, we expect real GDP to exceed its pre-pandemic level in 2022 Q1, and to surpass its pre-pandemic peak in 2023 Q1. Due to the negative growth in 2021 Q3, these milestones are now expected to occur one quarter later than our previous forecast.
- ◆ With regard to the outlook for the CPI, accommodation and communication charges are likely to be disturbing factors of the basic trend. From the second half of 2021 onwards, the CPI is expected to turn and stay positive YoY due to the surge in energy prices. However, the basic CPI trend will remain weak due to downward pressure by service prices. We forecast a core CPI inflation rate of 0.0% in FY 2021, +0.9% in FY 2022 and +0.6% in FY 2023.

Notes: SNA = System of National Accounts. BOP = Balance of Payments. In the quarterly statistics, the figures in the first and second rows below the main series represent QoQ changes (%) and YoY changes (%) respectively. In the annual statistics, the figures under the main series represent YoY changes (%). Highlighted columns represent actual values.
