

Japanese Economy: Analysis and Forecasts No.141

12 December, 2022

A Macroeconomic Analysis Project

► This report is a summary of the economic analyses and forecasts put together by APIR's macroeconomic analysis project team.

► The project team consists of young professionals from member companies and APIR researchers, and is headed by Yoshihisa Inada, Director of the APIR Center for Quantitative Economic Analysis and Professor Emeritus of Konan University.

► This report and the forecasts in it were co-authored by Yoshihisa Inada and Mitsu Shimoda from the Japan Applied Research Institute.

► This project is part of a 40-year research collaboration between young business professionals and academics, and its forecasts are widely used.

► The project was originally established by Chikashi Moriguchi and Kanemi Ban, Professors Emeritus of Osaka University. Since 2005 it has evolved into an endeavor to incorporate Current Quarter Model forecasts into the existing quarterly macroeconomic forecast model.

► Aiming to provide a timely response to changes in the economy, the report has been published quarterly since 2004.

Forecast Highlights

Revised Outlook for Japan's Economy Reflecting the Second Advance 2022 Q3 GDP Estimate

- Real GDP growth forecast: +1.5% in FY 2022, +1.1% in FY 2023, +1.4% in FY 2024 -

- ◆ According to the second official advance estimate, Japan's real GDP growth in 2022 Q3 was an annualized -0.8% QoQ, which was an upward revision from the first advance estimate (-1.2%). Previous GDP figures were retroactively revised due to revisions in seasonal adjustments and basic statistics. As a result, compared to the first advance estimate, Q1 GDP growth was revised downward sharply by -2.0%pt (from +0.2% to -1.8%). Thus, Q3 growth was negative for the first time in two quarters. The carry over effect for FY 2022 GDP growth, which assumes zero QoQ growth throughout the fiscal year 2023, was revised downward by 0.2 %pt from first advanced estimate.
- ◆ The second advance estimate for FY 2020 and the first advance estimate for FY 2021 were released simultaneously, resulting in upward revisions in GDP growth of +0.4 %pt (-4.6% to -4.1%) in FY 2020, and +0.2 %pt (+2.3% to +2.5%) in FY 2021. According to the second advance estimate, the pre-pandemic peak of Japan's real GDP was in 2019 Q3.
- ◆ We have revised our outlook for the Japanese economy for FY2022-24, taking into account the second advance estimate of Q3 GDP and our new assumptions about exogenous variables. We forecast real GDP growth of +1.5% in FY 2022, +1.1% in FY 2023, and +1.4% in FY 2024. The downward revision for FY 2022 is due to a decline in the carry over effect.
- ◆ Real GDP in Q3 2022 remains 1.9% lower than its pre-pandemic peak. This is mainly due to private final consumption expenditures (-3.2%), private capital formation (-3.3%), and exports of services (-15.1%) remaining below their peaks. If no new restrictions are imposed on economic activities during the forecast period, households' forced savings are likely to be unleashed in the second half of FY 2022. Therefore, we expect a recovery led by private final consumption expenditures, especially service expenditures. The contribution of private-sector demand to GDP growth is expected to decelerate, so the growth rate in FY 2023 is projected to decline relative to FY 2022. Real GDP is not expected to exceed its pre-pandemic peak until 2024 Q1 or later. Since the second advance estimate revised the historical data, real GDP will exceed the pre-pandemic peak two quarters earlier than previously forecast.
- ◆ Soaring energy prices, the weak yen, and the rising prices of imported goods will cause CPI inflation to exceed 3% in the second half of FY 2022. The CPI trend in FY 2023 will be determined mainly by the trend in service prices, as the impact of energy price hikes will fade away. In this sense, wage increases in FY 2023 will be important. We forecast the inflation rate of the CPI core index to be +3.0% in FY 2022, +1.9% in FY 2023, and +1.2% in FY 2024. Compared to our previous forecast, the FY 2022 forecast has been revised upward by +0.3%pt to reflect current conditions. The forecast for FY 2024 has been revised downward by -0.1 %pt.
